

AMALFI

Contemporary or classic? How do you decide when faced with the choice of these two often-disparate ideals: one living in the here and now, one harking back to earlier times? Can you achieve both? The Amalfi range of chairs does not fit into the same box as other furniture. It provides an opportunity to think outside the square, to hone a distinctive look that is uniquely yours and to be at once past and present with your style.

AMAFI 0239D 2 SEATER

The design template is imported straight from the heart of Italy. Once here, Kovacs takes the strong timber componentry as the perfect foundation upon which to build this striking collection of upholstered chairs. With fabrics of inspirational colour, pattern and texture and a choice of exquisite finishing processes, anything, and everything, is possible.

The strength of this range exists in both its scope and flexibility. The straight lines and easy curves of particular models can comfortably reside in any room. Likewise, the more complicated arcs of certain Amalfi chairs can be upholstered to compliment and enhance your existing pieces.

'Timeless design' is timeless for a reason. When other styles come and go, a design classic captures the perfect balance. It lives through the ages, challenging and inspiring others to similar heights of excellence. The Amalfi range captures this historical grace and style while remaining on the cutting edge of the modern aesthetic.

A final touch can bring the entire chair to life. The choice of wood finishing and upholstery trim is another option that provides each chair a vital individuality. Most importantly, the entire range is open to you for adaptation and enhancement.

The Amalfi range is available in a variety of foundation styles, from impressively ornate to perfectly simple.
