RECLINER CHAIRS | MADE IN NEW ZEALAND

## Adele

# Adele

The recent debut of the Adele has seen many a double-take from those looking through the showroom. The chair's small footprint and a light, Scandinavian design character makes it at first appear slight and insubstantial. Beneath the surface this chair benefits from incredibly sturdy construction, and above it the sitting experience is one of faultless support and incredible comfort. The headrest features both height and angle adjustment while the sliding armrests follow the body movement when reclining.

## DIMENSIONS

Total height	100-110
Seat height	46
Total width	74
Depth upright	80
Depth reclined	160-170

The Adele frame is chrome plated polished steel.
