LOUNGE SUITE

The chair above is fitted with a motorised recliner action and lockable heavy duty wheels for ease of movement. Firm arms and seating position make the Seddon easy to stand up from.

The Seddon range is designed for maximum comfort within a compact footprint. The higher seating position and more upright stance suit people who like to remain attentive and active while seated. The chair can be fitted with a manual or a motorized recliner mechanism. Lockable heavy duty wheels can also be specified if required. Settees complete the range.

DIMENSIONS (CM)	W	D	H
Chair	75	87	110
2 seater settee	134	87	104
2½ seater settee	158	87	104
Seat height (varies with foot chosen)			53

The matching settee is ideally suited to smaller lounge rooms or apartments.

The chair above is fitted with wooden legs. The back legs are slightly shorter than the front and would suit most lounging situations. The option exists to specify 30mm longer back legs - this brings the chair into an even more upright position.
